

COMFORT CHUTES H★Series keeps the cow comfortably secured in a natural, upright position and reduces the physical labor needed to trim feet. Clever engineering allows all tasks to be performed with the touch of a lever.

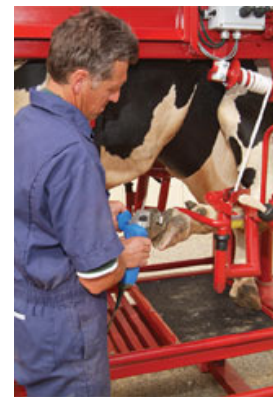

Handle Cows With Ease

The **H★Series** is engineered to keep the cow's space open. The attached lead-in station at the rear of the chute provides a narrow channel to safely load the cows. With one switch, the tailgate closes behind the cow and the lead-in gates are automatically removed from your workspace.

- A stationary chute for on-farm use - [Model H★S](#)
- A trailer package for professionals - [Model H★T](#)
- Equipped with the [ACCU-TRIM](#) Leg Restraint. Innovative features and [Specifications](#)
- Eliminate any physical strain on your body. The cow raises to your comfort level allowing you to work in an ergonomically correct position.
